

The W3 is a very reclined seat which is designed for low race vehicles such as formula cars. It is extremely narrow yet can still accommodate a wide variety of driver sizes up to 100 kg. The W3 has a GRP front surface and can be ordered with a floor mountable back frame which allows the seat to be self supporting. With the back frame version the seat can be mounted to an adjustment runner system. However, seat runners are not recommended for motorsport purposes. The W3 can also be ordered with a Dinamica suede covered panel set. Seat belt harness holes are included.

W3 GRP

You have the choice to order a 40 or 43 cm wide front.

External 40 cm or 43 cm

W3 recommended mounting points when fitting without integral back frame

W3 GRP with back frame
